

	UNIVERSITY OF EAST SARAJEVO						
	Faculty of Philosophy						
	Study programme: Geography and Geospatial basics of Environment						
Undergraduate level			III class				
Title of Course		REGIONAL GEOGRAPHY OF EUROPE					
Department		Geography					
Course code		Status of course		Semester		ECTS	
G 6-2		Obligatory		VI		6	
Teacher		Goran Mutabdžija, Associate Professor					
Assistant		Sanda Šušnjar, master					
Fund of classes / teaching load (weekly)			Individual student workload (in semester/ h)			Student workload coefficient	
T	AB	LV	T	AB	LV	S₀	
3	3	0	45	45	0	/	
Total teaching load (in hours, semester) 45+45+0=90			Total student workload (in hours, semester) 45+45+0=90*1.4			1.4	
Total course load (teaching + student): 90 + 126 = 216 semester hours							
Learning outcomes		<ol style="list-style-type: none"> 1. Importance of the historical-geographical and cultural-civilizational development of Europe. 2. Interpretation of socio-geographical characteristics, above all population, science and economy, as the main drivers of European development. 3. Recognition of new regional structures in Europe, identified on the basis of nodal-functional regionalization and innovation of regions. 4. Importance and need of the territorial organization of Europe based on the NUTS classification. 5. Acquiring knowledge and skills to produce student papers on regional analysis and synthesis 					
Conditionality		Compulsory attendance > 70% of classes and achievable > 50% of pre-requisites					
Teaching methods		Geographical, cartographic, historical, textual, comparative					

Course content per week	1. Introduction, basic geographical information on Europe and paradigms of regional geography		
	2. Geological-geomorphological features of Europe		
	3. Climatic-hydrographic and biogeographical-pedological features of Europe		
	4. The cultural-civilizational development of Europe from antiquity to post-industrial society		
	5. Population - from ethnic and linguistic to migration and aging
